QUALITY POLICY

The Management of INDUPLAST S.p.A. has set itself the goal of implementing and implementing a management methodology of its own processes, with the aim of growing and continuing over time our company in full compliance with current regulations.

OUR PRINCIPLES

- Define, document and monitor commitments and responsibilities within our company;
- Communicate this policy to all stakeholders and ensure that it is understood, shared, implemented and supported at all levels of the Organization;
- Periodically identify and verify our short, medium and long-term objectives;
- Plan our growth strategies with respect for the environment and the context in which we operate;
- To adequately select the suppliers putting them in the condition, through the support of an exact documentation, of being able to supply us according to our necessities.

OUR OBJECTIVES

- Operate in such a way as to ensure compliance with the laws, regulations and customs in force in the social context in which we operate;
- Continuously improve the quality of the management of the company and the services offered with the consequent generation of positive results both of an economic nature and in terms of excellence and reputation towards the outside - with full satisfaction of customers and partners;
- Ensure the availability of professionalism always adapted to the needs of stakeholders and our market;
- Evaluate the opportunities offered by the target market and the potential impact on our Organization;
- Periodically identify and evaluate the possible risks/opportunities associated with our business processes;
- Cyclically identify the possible dangers arising from the performance of their activities and services, analyze the associated risks and evaluate the consequences for the protection of workers in accordance with the laws in force;
- Consciously manage your business processes in the normal operation phases and heavy workload in order to keep under control, eliminate and where possible minimize any significant accident risk, in accordance with the current state of technological knowledge as far as economically feasible and in the logic of continuous improvement;
- Design and manage business changes, or processes in order to minimize associated risks;
- Involve all our staff, depending on the roles of each, in the management and improvement of our processes;
- Provide appropriate information to suppliers to ensure their involvement in the application of the principles of this quality policy;
- Inform customers about the quality methods to be adopted for the correct use of our products;
- Define and apply appropriate control methodologies in order to avoid the release of non-compliant products;
- Monitor and evaluate the achievement of the objectives set.
